TEQIP-III

EXPERT LECTURE

Chemical Engineering Department is organizing two Expert lectures on 04th April 2018 at Conference Room in the Department of Chemical Engineering, Faculty of Engineering & Technology, Mahatma Jyotiba Phule Rohilkhand University, Bareilly.

The first lecture will be given by Prof. Surendra Pal, Independent Director, B.L Agro Oils Ltd., Parsakhera, Bareilly, at 11:00 am on **“Refining of oil and its importance”**.

Without refining crude is as useful as a pile of dirt. But by refining we are able to get lots of useful products like petrol, kerosene, jet fuel, organic compounds, and a lot of things we use today. So refining is very important to us.

The crude oil obtained from solvent extraction plant contains impurities. **Vegetable Oils Refining** is necessary for vegetable oils & fats or animal oils & fats so they can be used for cooking and frying foods.

The second lecture will be given by Shri S.K.Suri, Chairman, Institute of EHS Studies, Bareilly, at 02:00 pm on **“Industrial Hygiene, Hazardous chemicals and Material Safety Data Sheet”**.

Industrial hygiene has been defined as “that science and art devoted to the anticipation, recognition, evaluation, and control of those environmental factors or stresses arising in or from the workplace, which may cause sickness, impaired health and well-being, or significant discomfort among workers or among the citizens of the community.” Hazards are present in all organizations, so understanding best practices to minimize hazards and reduce them to acceptable levels is crucial for every workplace. Having and utilizing a proper Industrial Hygiene management system will set organization apart and will empower us to keep the employees safe.

Material data safety sheet is a formal document containing important information about the characteristics and actual or potential hazards of a substance. **Safety data sheets** are **important** in helping you, or anyone you supply, to make the workplace safe and to protect the environment.

Date & Time: 04th April 11:00 AM onwards
