8)Dr. V.Kannan

(57) Abstract:

Impact on Financing Self-Help Groups Abstract: Women become more self-confident when they defy social and cultural norms in order to improve their own well-being. Women who participated in self-help groups (SHGs) became more socially and economically independent as a result. This study looks at how self-help groups can help women become more powerful in the southern Indian state of TamilNadu. All of the data in this study is from secondary sources, and the paper's instructions were followed to the letter. SHGs have had a greater impact on the well-being of those they assist than other types of assistance.
